

CSI Data Xtractor enables you to download table data from any SAP system and independently view and/or export SAP tables into MS Access databases, CSV, MS SQL databases and/or XML files.

CSI Data Xtractor supports functionality for reading and exporting STAD data in/from SAP environments. Information about which user executed which transaction code at which time, can be retrieved from your SAP system. Appropriate STAD periods can be selected in the SAP system and downloaded.

CSI Data Xtractor is available as a **Lite** and a **Pro** version:

- CSI Data Xtractor **Lite** is restricted and can only download a pre-defined set of tables that are used by other CSI tools applications, and is restricted in export options.
- CSI Data Xtractor **Pro** comes with additional functionalities and is not restricted in terms of table data that can be downloaded and has better performance. Download sets can be modified and created from scratch. CSI DX Pro is not restricted in export options.

| Functionality | CSI DX Lite | CSI DX Pro | CSI MUM |
|--|----------------|-----------------------------|---------|
| Download data | CSI tools only | Unrestricted | N |
| Download data output | MS Access | MS Access, MS SQL, CSV, XML | N/A |
| View results | Y | Y | Y |
| View STAD data | Y | Y | Y |
| (Mass) User/Role sync | N | N | Y |
| (Mass) User sync | N | N | Y |
| (Mass) Role/Profile sync | N | N | Y |
| (Mass) User delete | N | N | Y |
| (Mass) Role delete | N | N | Y |
| (Mass) User reset password | N | N | Y |
| (Mass) User lock status | N | N | Y |
| Concurrent block reads while downloading | 1 | Multiple | N/A |
| Concurrent syncs while downloading | 1 | Multiple | N/A |

License Types of CSI Data Xtractor

Both CSI Data Xtractor versions are available as a **single** or as a **corporate** license:

A **single license** allows for 1 installation on 1 computer for 1 user, and is valid for 1 year.

A **corporate license** allows for multiple installations in the same organization, and is valid for 1 year.
