

CSI Mass User Maintenance

Drastically speed up SAP user management

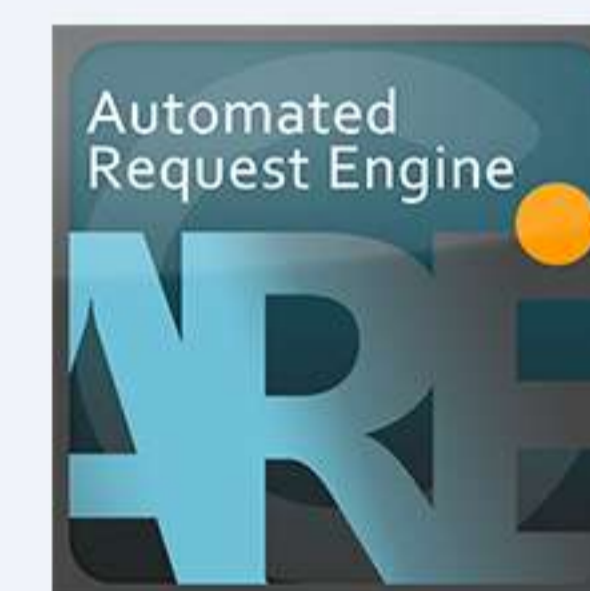

CSI Mass User Maintenance (CSI MUM) makes user maintenance in SAP systems more efficient and effective. CSI MUM has all the functionalities to speed up the user management process.

Main functionalities of CSI Mass User Maintenance

- (Mass) creation of SAP user IDs, with automatically generated passwords and emails for new users.
- Password resets for existing SAP user IDs, including secure emails to user with the new credentials.
- Synchronizing users, assignments and updates.
- (Mass) deletion of SAP user IDs.
- (Mass) locking and unlocking of SAP users.
- (Mass) role deletion.
- Role/Profile synchronizations can be handled efficiently.
- Quick view functionality to check in which SAP tables changes need to be made.
- Integration with MS Office.

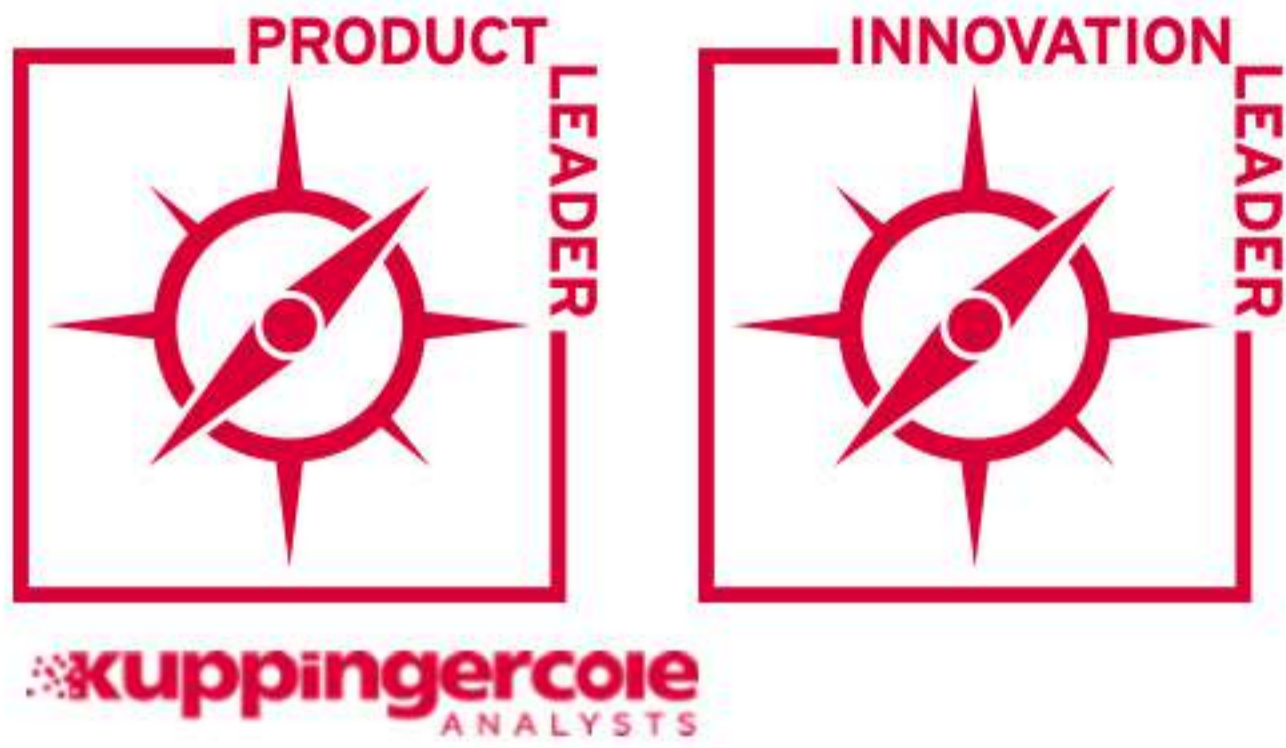

Implementation

CSI Mass User Maintenance can be licensed either separately, or as part of CSI Role Build & Manage. CSI MUM's functionality, with compliant user provisioning and SoD checks with approval workflow, is also available in CSI Automated Request Engine.
